Programming Languages

Python

C++

Java

JavaScript

Dart

Frameworks & Libraries

ReactJS

Flutter

Flask

OpenCV

TensorFlow

YOLOv8

Tools & Core Concepts

Git / GitHub

MySQL

CARLA Sim

System Design

IoT / ESP32

AI / AUTONOMOUS DRIVING

AutoVision AI

Python • CARLA • YOLOv8 • OpenCV • Flask

AI-powered autonomous driving system with real-time lane detection, vehicle control, obstacle detection, and sensor fusion. Includes a Flask dashboard for telemetry.

View Live Demo →

MOBILE DEV

CodeBharat Transliteration App

Flutter • Dart • REST APIs

Cross-platform mobile application supporting text translation and transliteration between multiple languages with optimized API integration.

View Live Demo →

ROBOTICS & IOT

Intelligent Hospital Assistant

ESP32 • IoT • Robotics

IoT-based autonomous robot capable of obstacle avoidance, automatic navigation, and manual control for hospital assistance.

WEB DEVELOPMENT

Drone & Robotics Club Platform

Raj.dev

ReactJS • HTML/CSS • JavaScript • MySQL

AboutSkillsProjectsAchievementsContact

A responsive web interface integrated with an IoT smart robot for real-time monitoring, data management, and remote control.

View Source →

EMBEDDED SYSTEMS

RC Bluetooth Controller Car

ESP32 • C/C++ • Motor Driver (L298N)

Developed a Bluetooth-controlled robot operated via mobile device, involving hardware interfacing, embedded programming, and circuit design.
