CAREER OBJECTIVE

Aspiring Software Engineer with strong foundation in Full-Stack Development, Scalable Systems, and Product Engineering. Passionate about building user-centric, data-driven applications that solve real-world problems at scale. Seeking SWE Internship at Flipkart to contribute to high-impact, large-scale e-commerce solutions leveraging modern tech stacks and agile development practices.

EDUCATION

Sagar Institute of Science and Technology (SISTec), Bhopal B.Tech. – Computer Science Engineering CGPA: 7.6 / 10	2023 – 2027
Govt. Sanjay Gandhi Higher Secondary School, Teegaon, Pandhurna 12th MP Board 71.80 / 100	2023
Bright Convent High School, Teegaon, Pandhurna 10th MP Board 80 / 100	2021

TECHNICAL SKILLS

Programming Languages: Python, C/C++, JavaScript, Dart
Web Technologies: HTML, CSS, JavaScript, ReactJS
Frameworks & Libraries: Flutter, TensorFlow, PyTorch, YOLOv8, OpenCV, NumPy
Tools & Platforms: Git & GitHub, VS Code, MySQL, CARLA Simulator, ESP32, Arduino IDE, REST APIs
Core Concepts: System Design, DBMS, OS, Computer Networks, AI/ML, Computer Vision, IoT & Robotics, Cloud Computing

PROJECTS

Drone & Robotics Club – Official Website <i>Role: Frontend Developer ReactJS · HTML · CSS · JavaScript</i> - Designed and developed official club website with responsive pages for events, projects, and activities. - Collaborated with 10+ members; improved digital presence and reduced manual communication by 60%.	raj80965.github.io/drone
CodeBharat – Multilingual Transliteration App <i>Role: Full-Stack Developer Flutter · Dart · REST APIs</i> - Built cross-platform Flutter app for 5+ Indian languages; 100+ beta users, load time reduced 35%. - Managed complete SDLC: design, implementation, testing, and deployment on Android.	raj80965.github.io/codebharat
AutoVision AI – Autonomous Driving System <i>Role: Backend Developer & ML Engineer Python · CARLA · YOLOv8 · OpenCV · Flask</i> - Achieved 87% object detection accuracy at 30 FPS using YOLOv8 across 3 simulated environments. - Built Flask telemetry dashboard for real-time visualization; cut debug time ~40%.	raj80965.github.io/AutoVision-AI
Intelligent Hospital Assistance Robot <i>Role: Hardware + Software Developer ESP32 · IoT · Python · Web Dashboard</i> - Built ESP32 robot with dual-mode control via IoT; real-time web dashboard reduced staff response time 25%. - Integrated IR gesture control and tested hardware-software components end-to-end.	raj80965.github.io/Intelligent-Hospital-Assistance-Robot

CERTIFICATIONS | ACHIEVEMENTS

Cisco Python Essentials 1 & 2 – Cisco Networking Academy	2024
Cisco AI Fundamentals & Cybersecurity Fundamentals – Cisco	2024
E-Commerce Website Certification – ISO, MSME - Oriental TechHack 2.0 – Secured Position in National Level Hackathon (Apr 2026) - SISTec Innovation Hackathon 3.0 – Best Technical Implementation mention for autonomous robotics solution - Robo Rush – Top 10 among 50+ teams, SISTec Drone Building Workshop – Assembled functional drone (Feb–Mar 2026)	Dec 2025

LEADERSHIP & EXPERIENCE

Drone & Robotics Club – IT and Social Media Co-Lead - Co-led 30+ member club; organized 5+ technical workshops and 3 project demos per semester. - Designed and maintained club website and digital platforms; grew social media engagement by 60%. - Coordinated technical documentation, project showcases, and hackathon participation.	SISTec – Present
